One-of-a-kind aesthetics

Renowned cosmetic dentist, Dentist of the Year 2022, and skincare extraordinaire Dr Manrina Rhode (DRMR) has gone a step further to create an ideal haven where patients can feel relaxed during treatments. Achieving ultimate minimalism involves a refined palette, attention to detail and finding substance

in simplicity, and Manrina has done just that. If you enter the surgery you'll find a camera in chair connected to three screens so patients can see what is happening during treatments, along with a beautiful Stern Webber 'robot' chair imported from Italy that turns quite seamlessly, and comes complete with a built-in computer. A poured resin floor, and Corian work surfaces add to the bare-boned beauty and with so few pieces throughout, every detail truly stands out.
