There is no formal training pathway for cosmetic dentistry in the UK.

Let me support you.

The path is technically and professionally lonely. Manrina's Mentorship fills that gap - giving you access to someone with over two decades of experience who has been through whatever situation you are facing, and who is always available. It is not a course. It is not a coaching programme with a fixed end date. It is a living, evolving community that grows with you.

THREE PILLARS

01

Personal Brand

We are in the era of the personal brand. You will build your own authentic online identity - not a copy of anyone else's. Social media, LinkedIn, Instagram, TikTok, podcasting, public speaking, award applications. Patients choose the person before they choose the clinic.

02

Excellent Cosmetic Dentistry

Direct access to someone with over two decades of high-end cosmetic experience who has been through whatever situation you are facing - case reviews, technique guidance, treatment planning, and a growing video library built around what you actually ask.

03

5-Star Patient Journey

You will receive the exact blueprint - the software, the protocols, the processes - not as theory, but as Manrina's working system. From the moment a patient finds her online to the moment they leave the chair. Everything congruent with the brand promise.

"I'm not teaching you what worked for me in the past. I'm showing you what's working right now - because I'm still doing it."

Is this *you?*

The Aspiring Cosmetic Dentist

You know you want to do more high-end cosmetic work. You haven't built the case flow, the confidence, or the brand to match yet. You're invisible online - patients at your own practice often don't know what you're capable of. You do brilliant work, but when people Google you, nothing meaningful comes up. Trapped in a general dentistry diary, trying to carve out cosmetic days.

"I have 3 general dentistry days to 1 cosmetic day - I want to invert this but don't know how."

The Established Dentist Feeling the Shift

Clinically capable, commercially invisible. You've built something real - 10+ years in, NHS/private mix - but production is falling and the diary is getting gappy. You're spending on ads and getting inconsistent results: renting attention you don't own. You know personal brand matters. You just haven't built it yet.

"The future belongs to those who educate, communicate, and build authority online. I know I have to embrace it properly."
